

AGRAMA MATERIALFLUSSTECHNIK GMBH & CO KG

HANDLING AND PACKAGING EQUIPMENT FOR POST PRINT AND BINDERY

AGRAMA is located in Germany with a settlement in Italy and is presenting the high sophisticated packaging line **Genius** which is dedicated to pack single books, stacks, CD's, calendars or other kind of material. Servo drive motors as well as a maintenance free sealing system combines the machine to a unique and easy operated packaging machine - ideal for a wide range and flexibility for graphic applications.

For single products the **Mailmaster** line offers in addition a wide range of applications with inserting, mailing, post jobs or letter shops. Depending on the type of product 130 copies per minute can be packed, attachments applied, cards added with or without glue and even address labels or laser or ink jet may be part of the supply. This machine is dedicated for customers who desire a high flexibility and love a machine which combines solid technique with easy operation.

AGRAMA offers for the bindery complete lines with transport, electrostatic blocking and in cooperation with MARIANI also the palletizer - complete lines out of one hand. Bindery equipment with high speed clamps and hopper loader complete the range of machines which are offered - high and fast pay back!
