### **DOUBLE COATED TAPES FOR PLATE MOUNTING**

Even the most sophisticated printing equipment could not meet its designers' expectations, nor reach the best performance level were it not supported by ancillary products such as sleeves, inks, plates enjoying the same high quality standard. Among them, double-coated tapes undoubtedly play a major role in the plate mounting applications.

All printers recognize the need for the best technological standard. In fact, flexo printing has reached such a level of excellence that no quality half-measures are tolerated.

**Bi.Esse Adesivi** has kept close pace with developments in printers' needs and is able to offer a wide range of products that satisfy all requirements.

The pride of the Milan company is the new **BS MOUNT** line of cushion tapes, produced in a wide range of adhesives, backings and, above all, the new "*pattern*" liner that avoids air entrapment. Furthermore Bi.esse's range comprises the ever green cloth tapes and the traditional corrugated tapes - that come in about a dozen versions.

Bi.esse's research activity is continuously stimulated by, and co-operates with, printers, producers of machines, components, inks, sleeves, etc. By doing so, our researchers explore more and more advanced solutions which will be eventually conveyed to everyday production.
