

NIMAX SPA

## WITH NIMAX YOU CAN GET IN-LINE VARIABLE PRINTING

Nimax can provide a range of ink jet printers and control systems to deliver solutions for a complete range of variable printing applications. Many of today's demands, from in line in-line addressing to unique numbering and coding, can be met by variable print solutions from Nimax.

Thanks to Nimax solutions, clients can expand their service range and grow their business adding value reliably and efficiently.

Clients can print variable data, text, numberings, bar codes and logo for different applications: in line addressing, tickets, tags, labels, promotions and games, mailing, plastic cards, postal systems.

Nimax can provide all ink jet technologies: continuous ink jet, binary and the new DOD (drop on demand). Each technology offers different features according to print resolution (until 300 dpi), print speed and print height. Nimax can complete the print solution also with verification and tracking systems, controllers, special softwares and mechanical solutions to get the best integration with the existing production line. You can incorporate the ink jet printers on most printing machines, both web or sheet fed, on finishing and binding lines, mailings systems .... with an incredible range of solutions for variable in line personalization.

Machines, programs, training, service, availability and research are all key elements in the overall Nimax approach towards the customer, to give concrete answers to any type of demand and to optimize the production cycle.
